

## **VPS PAINT PROTECTION FILM**

The concept of protecting the painted surfaces of motor vehicles using polyurethane film was pioneered in South Africa by VPS in collaboration with 3M Company SA.

Product development was undertaken between September 2001, and in March 2004, when VPS Paint Protection Film was launched into the South African market via a network of authorised VPS Paint Protection Film agents.

The product has passed through a number of upgrade processes and is now considered to be the best of its kind available. VPS is currently available from 25 Authorised agents across South Africa and Namibia.

VPS Paint Protection Film is approved by major motor manufacturers in South Africa. The product has been evaluated with praise by a number of respected motoring publications in South Africa, such as *CAR*, *SA 4x4*, *Leisure Wheels*, *Leisure Boating* and *Caravan and Outdoor*. VPS was also evaluated by *Toyota South Africa* and rated very highly by them.

In July 2008 VPS was approved by the *South African Civil Aviation Authority* for use on light aircraft up to 5700kg.
